CATALOGUE 2021

FABRICS WE USE

DRI-FIT POLYESTER

FONZA DRI-FIT POLYESTER series features advanced wicking performance. Specially formulated hydrophobic polyester fibers move heat generated body moisture away from the skin to the outer surface of the fabric. The enhanced dissipation of this moisture on the outer surface results in rapid evaporation, keeping you cool and comfortable. Construction of garments is a breeze as the Dri-fit fabric has a special interlock construction which prevents runs.

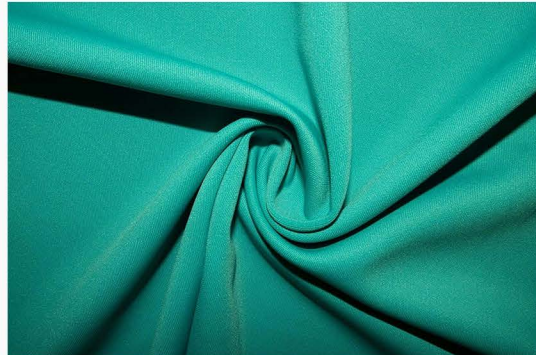

MESH-POLYESTER

FONZA - MESH POLYESTER series is perfect for athletics design. It is durable, breathable, and is comfortable to wear for all athletes out there. It's light and fits all sizes comfortably. Use this mesh fabric to make your team look like a pro.

MICROPOLY-POLYESTER

FONZA - MICROPOLY POLYESTER offers great control both of skin temperature and body hydration. It quickly removes any body humidity released during the game. It also dries quicker than any other fabrics thus keeping the body drier and fresher. It is an extremely comfortable fabric which offers a fresh sensation. Soft, light and airy, with a natural touch. It is also machine washable.

DOUBLE KNIT-POLYESTER

FONZA DOUBLE KNIT POLYESTER fabric is 100% polyester, heavy weight, tight knit, pro style baseball pants and jerseys fabric. It's durability ensures a long product life even under the most stressful situations.
